

Agustio Maitimu

Front End Developer

Ambon, Indonesia | (+62) 813 4304 1308 | agustiomaitimu04@gmail.com

SUMMARY

I am a 20-year-old Information Systems student at Universitas Siber Asia, specializing in Front-End Development since 2023. After my second semester in 2024, I took a break to dedicate myself fully to front-end development. My flexible, online, part-time university program allows me to pursue my passion for creating interactive digital experiences.

Since September 2023, I have intensely self-studied React on Next.js, utilizing Tailwind CSS for styling and showcasing my projects on Vercel. I find joy in bringing my code to life as functional, responsive, interactive web applications.

EDUCATION

Universitas Siber Asia (2023 – 2026)

B.Sc in Information Systems – 3.98 GPA

SKILLS

Tools

TailwindCSS, NextJS, Vercel, Version Control (Git), Github, Postman
